PROFILE

IT generalist and operations-minded systems builder with a cybersecurity specialization and a leadership track record spanning institutional-scale deployments and student governance. Sole developer of SAO-IS — a production Laravel 11 + React/Vite DMS deployed at Mapúa MCL's Student Affairs Office. Hands-on project output spans IoT fog computing systems, native Android analytics applications, and embedded hardware. Proven ability to take systems from concept to deployment in real institutional environments, working independently under production constraints.

EDUCATION

Mapúa Malayan Colleges Laguna <i>Bachelor of Science Information Technology, Major in Cybersecurity</i> - Dean's List Award – AY 2022, AY 2025 - Relevant coursework: Networking, Cybersecurity Fundamentals, Operating Systems, Cloud Computing, Information Assurance, Web Systems and Technologies	Cabuyao City, Laguna, Philippines Aug. 2022 – Nov. 2026
Malayan Colleges Laguna <i>Senior High School – STEM – Mathematics</i> - E.T. Yuchengco Institutional Scholar - Graduated With High Honors	Cabuyao City, Laguna, Philippines Aug. 2020 – Aug. 2022

TECHNICAL EXPERIENCE

Mapúa Malayan Colleges Laguna Student Affairs Office (OJT) <i>System Developer (Sole Developer)</i> - Sole developer and architect of SAO-IS — a production-grade, web-based Document Management System for the Student Affairs Office, built with Laravel 11 (PHP backend) and React/Vite (TypeScript frontend), hosted on a WSL2 Ubuntu server within the institution's on-premise infrastructure - Designed and implemented core modules covering document routing and tracking, student records management, disciplinary case workflow management, and multi-role user access control - Integrated Ollama (locally-hosted LLM) for on-premise AI-assisted document processing — configured across WSL2-to-Windows-host and bare metal networking, eliminating dependency on external API services - Built Tailscale + x11vnc remote access setup for secure off-site system administration, including mirrored GNOME/Xorg session access, of the production Linux server - Developer of Student Advising Report Generator – a native Windows application built with C#/.NET Framework (WPF) for offline report generation from i-ASCEND data.	Cabuyao City, Laguna, Philippines May 2026 – July 2026
---	---

CAPSTONE PROJECT

HopFog — IEEE 802.15.4 Fog Computing Communication System <i>XBee, ESP32, C/C++, AES-128 CTR, Fog Computing Architecture</i> A community-level Ad hoc Local Area Network communication system leveraging IEEE 802.15.4 communication technology and a fog computing architecture to enable real-time communication between community members, reducing dependency on traditional networking and communication methods. - Designed a distributed fog computing framework with ESP32 and XBee-based IoT nodes for localized communication system - Secured all data transmission between fog nodes and endpoints using AES-128 CTR mode encryption, applying cybersecurity principles directly in an embedded systems context - Optimized edge-layer data processing to minimize latency and eliminate cloud computing requirement, validating the fog computing model for resource-limited environments	Aug. 2025 – Jul. 2026
---	-----------------------

PROJECTS & TECHNICAL OUTPUT

StudentAnalytics

Native Android Application + PHP SOAP Backend, Kotlin, Android Studio, PHP, Azure App Service, GitHub Actions

- Built a full-stack academic analytics system with a Kotlin/Android native frontend and a PHP SOAP backend exposing four analytical modules: TWA grade analysis, course performance comparison, predictive academic modeling, and scholarship eligibility assessment
- Deployed backend to Azure App Service with a GitHub Actions CI/CD pipeline; environment-aware configuration supports local XAMPP development and cloud production simultaneously
- GitHub: github.com/hyoono/StudentAnalyticsApp | github.com/hyoono/student_analytics

Smart Posture & Ergonomics Camera Coach

IoT Embedded System, C/C++, Arduino IDE, ESP32-CAM, WEMOS D1 R1, FreeRTOS, REST API

- Architected a master-slave dual-microcontroller system: ESP32-CAM (master, AI + web server) and WEMOS D1 R1 (slave, feedback controller) communicating via HTTP REST API over a self-hosted WiFi access point
- Implemented a real-time posture scoring algorithm (0–100) via computer vision analysis of head tilt and shoulder alignment using the OV2640 camera module
- Delivered multi-modal user feedback (RGB LED, piezo buzzer, OLED display); hosted a live MJPEG camera stream and responsive web dashboard directly from the ESP32-CAM
- GitHub: github.com/hyoono/posture-coach-iot

Operational Automation — Institutional Tools

Python, Power Query M, Office Scripts, VBScript, Power Automate, Excel / SharePoint

- Developed a Python script (generate_shifting_report.py) to automate Shifting Request report generation from Microsoft Forms survey exports into MMCL-branded Excel workbooks with COUNTIF-driven summary tables and institutional charts
- Built a Power Query M pipeline to auto-aggregate SharePoint room booking calendars into a live IFO room availability checker with COUNTIFS and TEXTJOIN formulas
- Implemented an Office Scripts + Power Automate daily scheduled flow for the disciplinary case masterlist on SharePoint, with a self-guarding flag cell to prevent duplicate daily runs
- Built SUMPRODUCT summary formulas and a real-time case tracker dashboard consolidating data across all active disciplinary case sheets

LEADERSHIP & GOVERNANCE EXPERIENCE

Mapúa MCL – Supreme Student Council	Cabuyao City, Laguna, Philippines
President	Aug. 2024 – Aug. 2025
- Directed overall council operations and optimized administrative workflows, improving student service delivery across the institution - Led and managed 5+ campus-wide events with attendance ranging from several hundred to over 1,000 students, faculty, staff, and the public - Served as primary student liaison between the student body and institutional administrators for policy and welfare concerns	
Digital Transformation Director	Mar. 2024 – Aug. 2024
- Established and led the Digital Transformation Committee, defining its structure, goals, and project roadmap from the ground up - Supervised institution-wide rollout of Anthology Engage — a student organization management platform — successfully onboarding 30+ student organizations; managed platform compliance and adoption across departments - Designed and executed workflow digitalization projects, replacing manual administrative processes with scalable digital systems	
Events Staff Manager	Aug. 2024 – Aug. 2025
- Recruited, trained, and managed a 20-member events team overseeing end-to-end logistics, planning, and operations for all student-run events - Consistently delivered events on schedule, coordinating across vendors, facilities, and academic departments	
Mapúa MCL – CCIS Student Council	Cabuyao City, Laguna, Philippines
SSC Representative	Aug. 2024 – Aug. 2025
- Represented the College of Computing and Information Sciences in institution-wide governance sessions and cross-college initiatives - Co-organized events and programs focused on student welfare, academic support, and technology engagement	

TECHNICAL SKILL

Languages: PHP, JavaScript / TypeScript, Python, Kotlin, Java, C / C++, C#
Frameworks & Libraries: Laravel 11, React (Vite), Inertia.js, Android SDK
Databases: MySQL / MariaDB, Oracle DB, Microsoft SQL Server
Infrastructure & DevOps: Linux (Ubuntu / WSL2), Tailscale, Azure App Service, GitHub Actions CI/CD, Google Cloud
Embedded & IoT: ESP32, WEMOS D1 R1, FreeRTOS, OV2640, Arduino IDE, PlatformIO
Networking: CCNA — OSI model, subnetting, routing protocols, network diagnostics
Productivity & Automation: Microsoft Office 365 Suite, Power Query M, Office Scripts, Power Automate, SharePoint

CERTIFICATIONS & CREDENTIALS

CyberSocPH Membership <i>Cybersecurity Society of the Philippines Inc. (CyberSocPH)</i>	Jul. 2025
CompTIA Tech+ <i>Computing Technology Industry Association (CompTIA)</i>	Dec. 2025
Google Cloud Computing Foundation <i>Google Cloud</i>	Apr. 2025
CCNA: Introduction to Networks <i>Cisco Networking Academy</i>	Feb. 2025

SEMINARS & PROFESSIONAL DEVELOPMENT

Beyond the Breach 2026 <i>Organized by Mapúa MCL CCIS Speaker: Prof. Elizalde Javier Duran, Ph.D.</i> Organized and coordinated cybersecurity awareness seminar for CCIS students; handled logistics, digital certificates, and formal communications	Jun. 20, 2026
AI at Work <i>Direcho Trabaho Program by The Coding School & The Alvarez Foundation</i> Foundational AI literacy for the workplace, including hands-on exploration of generative AI platforms (Claude, ChatGPT, Gemini, etc.), prompting strategies and frameworks, real-world industry use cases, and principles of responsible and ethical AI adoption.	Jun. 13, 2026
Remote Sensing and Geomapping Workshop <i>Mapúa MCL Information Technology Society (ITSOC)</i> Hands-on workshop covering remote sensing and geomapping fundamentals — real-world applications, mobile data collection, and basic spatial data analysis	Jun. 26, 2025
Balancing Freedom of Expression with Discipline <i>Delivered by Atty. Maria Eloisa Gan Mapúa MCL Office for External Relations</i> Attended institutional lecture on SDG 16: Peace, Justice, and Strong Institutions	Aug. 29, 2024

AWARDS & RECOGNITION

Dean’s List Award <i>Mapúa Malayan Colleges Laguna</i>	AY 2022, AY 2025
E.T. Yuchengco Institutional Scholar (SHS) <i>Malayan Colleges Laguna</i>	Aug. 2020 – Aug. 2022
Graduated with High Honors (SHS) <i>Malayan Colleges Laguna</i>	Aug. 2022

LANGUAGES

Filipino: Native
English: Professional working proficiency (written and verbal)

STUDENT ORGANIZATIONS & AFFILIATIONS

Mapúa MCL – Supreme Student Council <i>President (2024–2025) Digital Transformation Director (2024) Events Staff Manager (2023–2024)</i>	2023-2025
Mapúa MCL – CCIS Student Council <i>SSC Representative</i>	2023- 2025
